About our buccal tubes...

Fairfield Orthodontics' buccal tube selection is built on the principal that orthodontists demand a wide variety of buccal tube attachments throughout their orthodontic treatments. We offer a very large and versatile selection. You will also find our buccal tubes are a great value.

Most of Fairfield Orthodontics buccal tubes are available weldable or bondable. Furthermore, because Fairfield Orthodontics stocks prewelded molar bands, we offer the buccal tubes prewelded to a band with a lingual attachment as an option. New to our line is Biomerge - a nickel free, one piece buccal tube with a trumpeted tube.

Fairfield Orthodontics is unique in that we inventory every doctor's prescription for prewelded molar bands. Unlike other companies, a molar band order placed with Fairfield Orthodontics doesn't need to be assembled. This means the fastest possible service- most orders are received within a day or two.

Fairfield Orthodontics wants to make the ordering process as simple as possible. Therefore, we developed the ez fax ordering system. On the back of this page is a fax order form which can be copied and used for placing band and buccal tube orders. You will find a similar order form at the beginning of each section throughout the catalog- each specifically designed for ordering the products in that section.

Buccal Tubes

FAIRFIELD Buccal Tubes

The FAIRFIELD line of stainless steel buccal tubes is unsurpassed in quality. The tubes are manufactured in a state of the art facility using high precision Metal Injection Molding (MIM) technology.

FAIRFIELD tubes feature a low profile design, comfortable hooks, and an anatomical design maximizing patient comfort. Other features such as trumpeted shape, octagon headgear tubes, and chamfered archwire slots facilitate the use of the tube.

Orthodontists demand a wide variety of buccal tube attachments so we offer a very large selection. FAIRFIELD buccal tubes are of consistent excellent quality and are a great value.

Comfort Hook for optimal patient comfort

Metal Injection Molded precision and quality

Flat Cap is lightly brazed for easy conversion

Chamfered Archwire Slot for easy wire insertion

Torque-In-Base provides level slot line-up

Anatomical Design conforms to the tooth
